

Aerial Work Platform

Aerial Work Platforms - There are different forklift attachments accessible on the market. They can help transform your lift truck so that you can expand your ability to pick objects up or finish clean up jobs and material handling with less effort.

Many of the accessories are specifically designed in order to fit on the forks themselves. Fork extensions for instance, are used if you need much more blade length, which increases lifting capability. Blade extensions come in lengths varying from 48-120 inches. Triangular or rounded attachments are another kind used if transporting rolled material in order to make certain it does not roll off of the traditional flat blades.

Lifting attachments can be pivoting and telescoping crane attachments. They come in numerous kinds. These accessories are usually designed for transporting lumber, metal bars, poles or any type of bulky things. Other accessories like other kinds of hook plates and hooks are offered so as to carry objects utilizing a chain or sling. Slab lifters and magnetic filters are other stuff that can be used along with hook accessories. Slab lifters are specialized attachments that are designed for carrying various materials which are delivered in a sheet or slab format. Carpet poles and rug rams are other lifting tools that attach to your forklift so as to make moving rolls of carpet easier. The accessory hooks onto the forklift's forks and has a pole that goes through the center of the carpet roll.

There are several kinds of forklift attachment intended for facility maintenance such as snow blades. These industrial forks could be connected to front end loaders and meant for transferring materials like snow, dirt as well as mulch. Other popular cleanup attachments consist of standard sweepers and magnetic sweepers. Standard sweepers includes a broom which the forklift forks hook onto for sweeping big spaces such as parking lots or warehouse and factory floors. The magnetic sweeper is similar except that it has a magnetic plate rather than bristles. The magnetic sweeper is utilized in places where there is lots of metal debris such as on shop floors for example. Sweepers have widths up to 60 inches and this surface area makes clean up quick and easy.

Material spreaders are other attachments used on lift trucks. These spreaders are useful for various applications such as spreading rock salt, pellets, fertilizers, insecticides, seed and ice melt.

Work platforms are another optional lifting attachment that many businesses utilize day after day. The platforms range in size from 36" x 36" to up to 60" x 60". There are some units presented that are capable of folding up and storing into a smaller space. Work platforms are designed to raise employees up to an overhead location with the use of the forklift. Larger platform units have added space for employees in order to bring tools and other essential items for the job. Often work platforms are constructed of poly material or steel.
